WINNERS OF LINCOLN ARC WELDING AWARDS

The pictured members of Sigma Tau were among the 77 undergraduate engineering students whose industry and originality won them cash awards from the James F. Lincoln Arc Welding Foundation of Cleveland, Ohio, during the school year 1942-43. This foundation, established in 1936, "has the educational objective of stimulating managers and engineers in both industry and college to acquaint themselves with the engineering, industrial and human progress possible through the use of welded designs." Last year its awards, ranging from \$1,000.00 to \$25.00, went to students representing 33 colleges and universities. We congratulate our members whose achievements have brought them this distinction.
